

Hwk1: Another algorithm description problem

3 piles

First pile: contains paper balls

Second pile: containing no paper balls initially

Third pile: containing no paper balls initially

1. Grab two paper balls from first pile
2. Compare which ball is bigger and leave bigger ball in right hand
3. Place smaller ball in second pile
4. Grab a ball from first pile and repeat 2nd step
5. If no balls in first pile
6. Check if any balls in third pile if none place ball in third pile
7. If any balls in third pile place to the right of the furthest right ball in pile already
8. Check second pile if balls remain place balls in first pile go to 1st step
9. If no balls remain in second pile then stop comparing
