

Tech Essay

The purpose for this essay is to build on your knowledge gained from your literature review to describe a problem in your technical field and propose a solution. To put some bounds on this, consider a problem that would be within the scope of a capstone project.

In structuring your essay, describe the problem first, imagining that your audience is not familiar with your topic. Then propose your solution. When you suggest a solution, your case will be stronger if you include a refutation of possible solutions that you believe would not work.

You should have at least two sources in your bibliography. Try to avoid textbooks, and use good primary and secondary sources. You should give preference to academic sources, but whitepapers are acceptable.

NOTE: You will also make an individual, short video presentation on this topic.

Your Tech Essay should meet the following formatting guidelines:

- Approximately three pages plus bibliography
- MS Word document
- Font: Times New Roman, 12 point
- A centered header with the title, your name, class, and date single spaced (1.15)
- Double spaced text = 2.0 line spacing in Word
- Indentation of new paragraphs
- “Normal” margins in Word, 1 inch
- A bibliography of your sources in either ACM or IEEE format depending on your major

Post your document to the “Tech Essay” assignment link. Do not post PDF documents, post only MS Word documents.

Grading: The rubric is available. Be sure to contact your instructor early with your questions so I can help you before the deadline.
