

Group Inventory: Team 4

Please complete this table as a group, optimally after completing the Self-Reflective Team Communication Exercise

Student Name & Major	Superpowers (e.g., research, technology, design, interpersonal, writing, production or presentation skills)	Willing to support...	My time constraints	I work best by...	My biggest teamwork worry is...	The most important aspect of this project to me is...
Tyler Vander Mooren. Cyber Security	Planning and organization, technical understanding, clear writing	Project planning, outlining, editing/reviewing final work	Just work till 7pm PST at the latest.	Front-loading the work early, building a clear structure and working from a defined plan.	Lack of clear structure or communication, which can lead to confusion or rushed work.	Providing a well structured, high quality project.
Thomas Peaslee. Cyber security	Writing, production and presentation, technology	Planning, design, reviews, presentations and final submission	Preferably: Mondays-Saturdays but not Fridays	Getting deep into an assignment or project in one session, and blitzing through it	Being last minute works for me, but could be an issue in a group setting.	Making sure I am there to provide an equal amount of effort as my partner.
